

Notice

It has been observed that despite several reminders regarding class attendance, some students have failed to attend classes regularly not only to maintain 75 percent attendance, in accordance with University norms, but also to expand their academic knowledge and develop insight into the subjects.

Given the students' academic future, management, Impact Group of Colleges, has come up with following decision to make observation:

1. It is mandatory for students to maintain required attendance to excel in studies.
2. In case students fall short on requisite 75 percent class attendance, they will run the risk of being debarred from internal and external activities of College, even they can be deprived of University examination.
3. Students with maximum class attendance (80 percent and more) will be felicitated by giving them edge over other such students, playing truant from College.
5. Student with outstanding attendance record will be declared "The Best Student of the Month".
6. Besides awarding "The Best Student of the Month", such a punctual and sincere Student's name with stream and registration number will be published in College newsletter as well.
7. Felicitations and recognition of sincere students will definitely boost motivation of other careless students for attending classes consistently without fail and bettering their academic knowledge and future.

Take a serious note of it and reap the numerous academic benefits of regular class attendance.
