

WHY DO BUSINESSES NEED SYSTEM ANALYSTS?

Subject: System Analysis And Design
Prepared By: Apurva Mishra
Department: Computer Application

UNDERSTANDING BUSINESS REQUIREMENTS

Businesses need System Analysts to:

- Gather and analyze user requirements
- Identify what users actually need vs what they say
- Avoid miscommunication between stakeholders

Benefit:

- ✓ Accurate system development
- ✓ Reduced errors and rework

IMPROVING BUSINESS PROCESSES

System Analysts:

- Ensure system is user-friendly and error-free
- Conduct testing and validation
- Provide data and reports for decision-making

Benefit:

- ✓ Better business decisions
- ✓ High-quality systems
- ✓ Improved customer satisfaction

SYSTEM QUALITY & DECISION SUPPORT

System Analysts ensure:

- Proper planning of projects
- Efficient use of resources
- Identification of risks (technical, financial, operational)

Benefit:

- ✓ Reduced project cost
- ✓ Timely delivery
- ✓ Minimized risks
